

KNX Secure IP Router

| | |
|-----------------------------|---|
| Product Code | ITR901-1001 |
| Power Supply | KNX Power Supply |
| Current Consumption | < 17.5 mA |
| IP Connection | RJ45 Ethernet Connector |
| Max APDU Length | 240 Bytes |
| Type of Protection | IP 20 |
| Temperature Range | Operation (-5°C...45°C) Storage (-20°C...60°C) |
| Maximum Air Humidity | < 93 RH |
| Color | Light Grey and White |
| Dimensions | 90x36x71 mm (HxWxD) |
| Certification | KNX Certified |
| Configuration | Configuration with ETS |

DESCRIPTION

ITR901-1001 is a KNXnet/IP routing & tunneling secure device and works as KNX IP line/area coupler. An external power supply is not necessary. The ability to address all bus devices in the KNX bus system makes network operations less time-consuming. Operational and filtering states, malfunction and faulty communication are indicated by LEDs. UPnP is available and the firmware can be updated by a comfortable Web front-end. Long messages with up to 240 bytes APDU length are supported. For IP Secure Tunneling, four (password-protected) Tunneling channels are available.

ITR901-0001 connects the two communication media Ethernet/ KNX IP and KNX TP to feature (for all bus devices connected):

- Secure commissioning
- Addressing
- Setting parameters
- Secure tunneling
- Protocol
- Diagnostic operations

ITR901-1001 is able to filter the traffic according to the installation place in the bus system hierarchy and according to the built-in filter tables for group oriented communication. Configuring from the subline can be blocked. Message filtering can be temporarily deactivated by a single button press. The time period to automatically switch back to normal operation is ETS-configurable. To ease commissioning, temporary access to other lines is possible also without download from the ETS.

MOUNTING, COMMISSIONING AND SAFETY NOTES

- The device may only be installed and put into operation by a qualified electrician or authorized personnel.
- For planning and construction of electric installations the appropriate specifications, guidelines and regulations in force of the respective country have to be complied.
- For mounting only use an appropriate equipment according to IEC60715.
- Installation only in distribution boards and enclosed housings.

- Installation only on a 35 mm DIN rail (TH35).
- Connect the KNX bus line as for common KNX bus connections with a KNX bus cable, to be stripped and plugged into a KNX TP connector.
- Do not damage electrical insulations when connecting.
- Installation only in dry locations.
- Accessibility of the device for operation and visual inspection must be provided.
- For commissioning use the ETS.

CONNECTION DIAGRAM

1. State IP
 - Green: IP OK
 - Red: Manual Function active
2. KNX Bus State
 - Green: Bus OK
3. IP Telegram Traffic
 - Green: Telegram traffic extent
4. KNX Telegram Traffic
 - Green: Telegram traffic extent
 - Red: Transmission error
5. Group Address Routing
 - Green: Filter active
 - Orange: Route all
 - Red: Block all
 - Off: IP/KNX line different
6. Physical Address Routing
 - Green: Filter active
 - Orange: Route all
 - Red: Block all
 - Off: IP/KNX line different
7. Programming
 - Red: Program Mode
 - Red blink: No IP connection
