Midea Split Air Condition Units AC - KNX Gateway Secure Compatibility List

Midea Split AC - KNX Gateway Compatibility List

In this document, the compatibilities of Midea Split air conditioners with ITS830-1022 are described.

Specified models in the document are referred **indoor units**. If the last user wants to operate an AC unit with a model number not specified in this document might not be compatible with ITS830-1022. Models should not be used without checking model compatibility. The user should contact with supplier for this. Moreover, we recommend the users pay attention to the possible updates of the document.

Compatibility Table

All of the models described in the table below are referred to only indoor units. If a model number is not specified in this list, please contact us for a compatibility check. The connection diagram between the air conditioner interface and the air conditioner indoor unit is detailed in the ITS830-1022 datasheet/manual.

NOTE: The list below includes device models equipped with either the US/EU-SK105 Wi-Fi module connection connector or the XYE central control communication terminal.

This list is for general informational purposes only, and potential hardware variations based on production year or region should be taken into consideration. Therefore, before installation, please verify the Wi-Fi module compatibility or the presence of the XYE terminal with your authorised HVAC service provider.
